

# GO POP! ROUND0 RULES

## OBJECT OF THE GAME

Make your opponent press the last bubble.

## BASIC RULES

Each player, on their turn, selects a row and presses down any number of bubbles they wish in that row only. (If they wish, they may press all the bubbles in a row in a single move).

On their turn, the opponent selects any row with un-pressed bubbles (including the same row that the last player used), and presses one or more bubbles in that row.

The player who ends up pressing down the last bubble on the board loses the game. Flip over the playing surface and you're ready to enjoy another round!

## ADVANCED RULES

The rules remain the same with the only difference being that players can only press any number of adjacent bubbles in a row. If there is an empty space between two bubbles, the player can only press several bubbles in a row as long as they are adjacent and are not separated by a space.
